SDW-07: Percent of Classes I, II and Class III salt solution mining wells that have lost mechanical integrity and are returned to compliance within 180 days thereby reducing the potential to endanger underground sources of drinking water.

Reporter	Level	Data Type	FY08	FY09	FY10	FY11	FY12	FY13	
National	Nat'l	Result					85.0%	89.0%	Background Info
National		Commitment					90.0%	85.0%	
National		Universe					2,512	2,512	
1	Req. 1	Result							National Program Manager
1		Commitment							
1		Universe							
2	Req. 2	Result					90.0%	100.0%	Comments: Combined the 3 classes of mechanical integrity measures into one measure SDW-07. The denominator for the number of wells with mechanical integrity losses is very small. Typically, Class I, II and III wells are deep wells and there are many more Class II wells that lose mechanical integrity relative to Classes I and III wells (2,800 compared to 8 for Class I and 7 for Class III). The revised measure should improve the numbers in the denominator of the measure.

1	Req. 1	Result	7	100%	99%	100%	2,314	2,349	Comments: Measure revised for FY12. The measure includes all the wells covered by the EPA 1999 Class V Rule reporting on closed or permitted MVWDW wells. In addition, it allows for reporting on additional types of high priority wells including, at minimum, Large Capacity Cess (LCC) Pools. Reporting in percentages will not provide good information on progress in closing or permitting the MVWDW wells. The new measure, cumulative numbers of wells, for the MVWDW, will show progress each year against the universe.

1	Reg. 1	Result	5,454	340	439	253	264	148	National Program Manager Comments: Annual pace is the number of TMDLs needed to be consistent with national policy, i.e. generally within 8 - 13 years of listing of the water as impaired. EPA practice has been for the National Program annual commitment to equal the Regional Aggregate as this reflects the number of TMDLs that Regions and States are able to develop. The cumulative budget target is calculated based on 80% of pace (FY12: 2,555). With FY11 numbers final and adjustments made to FY12 regional universe and pace numbers in accordance to WQ-08 measure definitions, EPA will need to adjust the FY12 cumulative budget target as part of the FY13 budget submission.

National	Nat'l	Result	216	228	253	293	344	364	National Program Manager Comments: Regional annual commitments and completed NPDES Action Items are confirmed by the HQ Action Items database. Assessed programs include 45 authorized states, 5 unauthorized states (MA, NH, NM, AK, ID), 1 authorized territory (VI), 3 authorized territories (DC, PR, Pacific Island Territories), and 10 Regions (total of 64 programs) assessed through the Permitting for Environmental Results (PER) program and subsequent Permit Quality Reviews. Universe of 372 includes all follow-up Actions for which a schedule was established. The universe increases as additional NPDES Action Items are identified through Regional and HQ program review.

1	Req. 1	Result							Comments: The next Status and Trends Report (2011) will show a new downward trend. Data source: U.S. DOI, U.S. Fish and Wildlife Service, 2011. Status and Trends of Wetlands in the Conterminous United States 2005-09, Washington, DC. The overall decline in wetland area is complex and potentially reflected economic conditions, land use trends, changing wetland regulation and enforcement measures, conservation initiatives, the impacts of the 2005 hurricane season, and climatic changes. Qualifying language: The 2005-09 reporting period of this measure reflects that the data: a) are published in 5-year increments, which creates a fixed numerical target until the next report publication; and b) are already at least two years old upon publication. Thus, at any given time, reporting against this measure is never current.

WT-01: Number of acres restored and improved, under the 5-Star, NEP, 319, and great waterbody programs (cumulative).

Reporter	Level	Data Type	FY08	FY09	FY10	FY11	FY12	FY13	Background Info
National	Nat'l	Result	82,875	103,507	130,000	154,000	180,000	207,000	
National	Commitment		75,000	88,000	96,000	150,000	170,000	190,000	
National	Universe								National Program Manager Comments: These acres may include those supported by Wetland 5 Star Restoration Grants, National Estuary Program, Section 319 grants, Brownfields grants, or EPA's Great Waterbodies Program. Commitment represents a cumulative total. Unexpected accomplishments in FY06, particularly in the National Estuary Program, contributed significantly to the total number of wetland acres restored and enhanced.

National	Nat'l	Result	22	22	47	54	44	37	
National	Commitment		Indicator	Indicator	Indicator	Indicator	Indicator	Indicator	
National	Universe			50	50	584	584	584	National Program Manager Comments: Intended to allow us to track work of all states/tribes (those just starting to build wetland programs and those that are improving well developed programs). Tracks the number of states/tribes that have substantially built or increased capacity in wetland regulation, monitoring and assessment, water quality standards, and/or restoration and protection. Substantially built or increased capacity is defined as completing two or more of the actions found in the tables found at: epa.gov/owow/estp/. Universe expanded from states to states and tribes in FY11. *This measure is evaluated annually and is an indicator of where states and tribes are focusing their wetland development effort, the baseline resets to zero annually and is not a cumulative measure. This measure has revised measure language beginning FY10, which means FY10 results cannot be compared to previous years.

National	Commitment		No Net Loss	No net loss	no net loss	Indicator	Indicator	Indicator	National Program Manager
National	Universe						0.0000	(6.86%)	Comments: New measures starting in FY08. Measure change to Indicator in FY 2011. Strategic Plan baseline of 6.7% was revised to 6.8%. The Coral Reef Evaluation and Monitoring Project (CREMP) for the Florida Keys National Marine Sanctuary was modified in 2006 by dropping one hardbottom monitoring site because of the very small percentage of stony coral cover present (less than .2%), resulting in an increase of .1 percent in the mean percent stony coral cover for the entire Sanctuary.
1	Reg. 1	Result							Statistical analyses of the CREMP indicated that sampling a reduced number of stations at sites with low stony coral cover would still produce statistically valid results.
